SUMMARY

Detail-oriented Software Engineering student with a strong focus on development, particularly in web and mobile development. Proficient in a variety of programming languages and frameworks including Java, JavaScript, HTML, PHP, Bootstrap, CSS, React Native, Node.js, Android Studio, Flutter, and MySQL. Adept at creating and maintaining robust applications for both web and mobile platforms. Experienced in utilizing software development tools such as Git and Visual Studio, and familiar with database management systems. Demonstrated track record in developing high-quality software systems tailored to meet customer requirements. Eager to leverage my extensive development expertise to contribute to your organization's success. Available to commence an internship position in September 2024.

EDUCATION

Bachelor of Software Engineering with Honours (Information Systems)	Oct 2021 - Oct 2025
University Kebangsaan Malaysia	
- Major in Information Systems Development. - CGPA: 3.64. Dean List Award for 4 Semester.	
Foundation In Engineering	Feb 2021 - Dec 2022
Universiti Teknologi Mara Kampus Dengkil	
CGPA: 4.00. Dean List Award for All Semester.	

WORK EXPERIENCE

Freelance Software Developer, Universiti Kebangsaan Malaysia	Aug 2023 - June 2024
- Developed learning system regarding cryptography and cyber awareness for Imtiaz Melaka School. - Coordinated testing and validation, ensuring compliance with secondary school standards. - Maintaining open communication with the teacher and students to ensure the system meets their requirements	

PROJECT

Gamification In Cyber Awareness Learning System (Final Year Project)
- Created and implemented a web-based system using Node.js, Tailwind CSS and mySQL to make the learning system effective. - Quality Assurance was carried out and Agile Development technique was applied to guarantee the system's usability, efficacy and efficiency.
Mobile Application for Cafe Ordering System
Develop a mobile application for ordering app by utilizing Firebase and React Native framework.
Student Absenteeism Monitoring System
- Managed development team to deliver student absenteeism monitoring system project for university students. - Implemented user-friendly interface and system by using mySQL Database, HTML, PHP, Bootstrap and CSS .
